Drs. Hari and Veena Puri have been our pediatricians since the time I was a child. They have taken care of me and my two sisters since we were young. Not only was I under their care for 14+ years but all three of my children have been patients since birth. My children are ages 15, 12, and 3.

The Puris are more than just doctors to us they are also an extension of our family. We've shared the experiences of all the joys and difficulties of raising our children from shots and illnesses to the first time each of my children started walking and talking. They have a genuine caring for our family and take the time to have personal relationship with each of my children.

It's wonderful to find a doctor who you can trust and rely on. For most of mine and my children's lives we've lived in the East Bay close to the Puri's office. We've since moved to Tracy but still make the one hour drive to see them whenever my children are sick or need physicals. This is a big commitment on our part but I can't think of trying to find a doctor who can provide the care and service of the Puris. The staff is very helpful and friendly and treat us like old friends.

My family are very thankful for the wonderful care we've received and only hope that my grandchildren can also benefit from the care at Puri Pediatrics. My children have been able to enjoy many activities ranging from Ballet, Tap, Hula, Tahitian, Soccer, Cheerleading, and Track. We look forward to many more years of healthy care and great service.
